CBC Newsletter

for members of the Carolina Bird Club, Inc., ornithological society of the Carolinas

Volume 47

April/May 2001

Number 2

along the way but will be specifically seeking out other species. Also, we have arranged some very unique opportunities to observe interesting demonstrations by local folks. One such program is the Red-cockaded Woodpecker Nesting Ecology program involving an experienced woodpecker biologist from Ft. Bragg who will demonstrate the techniques used in monitoring and conservation. There will also be songbird and hummingbird banding, moth trapping, perhaps an actual prescribed burn and maybe even some bat mist-netting!

We have recently scheduled social events for both Friday and Saturday. The social hour on Friday will be in the late afternoon at Weymouth Woods State Nature Preserve. It will be sponsored by the Moore County Bird Club. Saturday's social will precede the evening meeting at the Holiday Inn. Check the schedule posted at Registration for more details on these and all the other of the weekend's events. We will also have material on restaurants and additional family activities available when you arrive. If you have any questions about lodging, field trips or the Southern Pines area, feel free to contact Susan Campbell at (910) 949-3207 or email ncaves@utinet.net.

EVENING SCHEDULE

FRIDAY

Social Hour hosted by Moore County Bird club at Weymouth Woods State Nature Preserve from 5-6 PM.

Scott Hartley, Superintendent of Weymouth Woods State Nature Preserve, will present a short talk entitled *Fire In The Pines*. Scott will explain how fire has shaped the Sandhill plant and animal communities. In particular he will discuss the various adaptations of endemic organisms to fire. Scott's slides will highlight many of the Sandhill 'specialties' we expect to encounter during the weekend.

SATURDAY EVENING

Social hour will precede the meeting and program from 7-8 PM at the Holiday Inn.

Annual Meeting followed by a presentation by Pete Campbell who is with the U. S. Fish and Wildlife Service's Sandhills Field Station. He is the Red-cockaded Woodpecker Recovery Coordinator for the Sandhills. Pete will present an update on the status of the Red-cockaded Woodpecker restoration effort in the Sandhills region of North Carolina. He will discuss both the challenges as well as innovative approaches involved in the current conservation

Registration for the CBC Spring Meeting in Southern Pines, NC is well underway. Headquarters will be at the Holiday Inn (US Highway 1 south at Morganton Road; (800)262-5737. Rooms at the meeting rate of \$65 may still be available. If not, there are numerous other motels in the immediate vicinity (see below for details).

Please note that there are two corrections to the information printed in the last newsletter which outlined the field trips: there will NOT be a trip to Jordan Lake (Trip 16) and the Raven Rock State Park trip on Friday should be Trip #15 (not 16).

We hope that you will take advantage of the interesting trips and programs we have lined up. A number focus on interesting organisms within the Sandhills ecosystem, like the plants, butterflies and moths, in addition to the birds. The trip leaders will keep an eye/ear out for birds

Our headquarters for the meeting will be at the Holiday Inn in Southern Pines on US Highway 1 (south) at Morganton Road. Rooms are \$65 per night plus 9% tax. **Reservations must be made by calling their toll free number 1-800-262-5737 before April 3.** Reservations after the cut-off will be honored based on availability. There are numerous motels about a mile further south on Hwy. 1 in Southern Pines if you cannot get a room at the Holiday Inn. You might try Best Western (910-944-2367 or toll free 800-528-1234), Days Inn (910-692-7581) or Hampton Inn (910-692-9266).

Southern Pines Field Trip Schedule

THURSDAY, MAY 3

These special trips will take place at Weymouth Woods State Nature Preserve. Meet in the Visitors Center.

TRIP 1 Prescribed Burning [2:00 PM]

TRIP 2 Moths Of The Sandhills [8:00 PM]

FRIDAY, MAY 4

Morning Half-Day Trips [Leave from the hotel parking area]

TRIP 3: Raven Rock State Park [7:00 AM]

TRIP 4: Woodlake [7:15 AM]

TRIP 5: Camp Mackall [7:15 AM]

TRIP 6: Sandhills Gamelands And Vicinity [7:20 AM]

TRIP 7: Southern Pines/Pinehurst Area [7:20 AM]

TRIP 8: Weymouth Woods State Nature Preserve [7:20 AM or meet at the reserve parking lot at 7:30 AM]

Afternoon Half-Day Trips

[Meet in Weymouth Woods State Nature Preserve parking lot.]

TRIP 9: Butterflies [1:00 PM]

TRIP 10: Wildflowers [1:15 PM]

TRIP 11: Hummingbirds [1:30 PM]

TRIP 12: Red-Cockaded Woodpecker Nesting Ecology

All-Day Trips

[Leave from the hotel parking area.]

TRIP 13: Pee Dee N W R and Vicinity [7:00 AM]

TRIP 14: Laurinburg And Points South [7:00 AM]

SATURDAY, MAY 5

Morning Half-Day Trips [Leave from the hotel parking area.]

TRIP 15 Raven Rock State Park [7:00 AM]

TRIP 17 Woodlake [7:15 AM]

TRIP 18 Camp Mackall [7:15 AM]

TRIP 19 Sandhills Gamelands And Vicinity [7:20 AM]

TRIP 20 Southern Pines/Pinehurst Area [7:20 AM]

TRIP 21 Weymouth Woods State Nature Preserve [7:20 AM or meet at the reserve parking lot at 7:30 AM]

Afternoon Half-Day Trips

[Meet in Weymouth Woods State Nature Preserve parking lot.]

TRIP 22 Butterflies [1:00 PM]

TRIP 23 Wildflowers [1:15 PM]

TRIP 24 Hummingbirds [1:30 PM]

TRIP 25 Red-Cockaded Woodpecker Nesting Ecology

All-Day Trips

[Leave from the hotel parking area.]

TRIP 13: Pee Dee N W R and Vicinity [7:00 AM]

TRIP 14: Laurinburg And Points South [7:00 AM]

SUNDAY, MAY 8

Several half-day trips will be scheduled to area hotspots the evening before. Locations will be dependent on bird activity Friday and Saturday.

SPRING CBC MEETING, MAY 3-6, 2001

MEETING & FIELD TRIP REGISTRATION

Saturday, All Day	_____	_____

Mail to Carolina Bird Club, 11 West Jones St., Raleigh, NC 27601-1029 by April 20, 2001.

Southern Pines Field Trip Descriptions

TRIP 1: Prescribed Burning

You will have the unique opportunity to join park staff at Weymouth Woods State Nature Preserve for a up close look at how a prescribed burn is prepared and conducted. Participants will measure weather parameters and if conditions are favorable, staff will burn a small area. The program is scheduled from 2:00-4:00 PM.

TRIP 2: Moths of the Sandhills

Join a park ranger to learn about the ecology of Sandhills moths and do some moth trapping. Various techniques will be employed to attract and trap a variety of species for observation and identification. We also will keep an ear out for owls and nightjars. Wear long pants and long sleeves and be sure to bring insect repellent and a flashlight. The program is scheduled from 8:00-9:00 PM.

TRIPS 3 & 15: Raven Rock State Park

Stroll the scenic bluffs along the Cape Fear River surrounded by hardwoods where neotropical migrants are often plentiful. Woodland birding in the park often turns up mixed flocks with unexpected species in the spring such as a Wilson's Warbler last year. Be sure to wear comfortable shoes since we may encounter some relief along the trails. However, the walking will not be too strenuous. Participants should be back at the hotel by 12:30 PM.

TRIPS 4 & 17: Woodlake

Enjoy a diversity of stops within the private residential golf community of Woodlake, which surrounds Lake Surf - the largest body of water in Moore County. Not only will we look for lingering waterfowl but also we will visit both upland hardwood and pine stands for migrants. Also the group will check the marsh behind the dam for Bald Eagle and breeding species such as Green Heron, Pileated Woodpecker, Yellow-throated Vireo and Prothonotary Warbler. We will also watch for large mammals such as Coyote, Grey Fox, Bobcat, River Otter, Beaver and Muskrat that frequent the area. The group should be back at the hotel by Noon.

TRIPS 5 & 18: Camp Mackall

Join Ft. Bragg biologist Alan Schultz for a guided tour of Camp Mackall. The installation is a satellite training area of Ft. Bragg with extensive pine savannahs as well as bottomland hardwood along Drowning Creek. It is here where the Army's elite Special Forces trains that Lark Sparrows have been found breeding. There are open areas of Longleaf Pine and Wiregrass where we may find Northern Bobwhite, Loggerhead Shrike, Red-cockaded Woodpecker and Brown-headed Nuthatch. The bottomland habitat could produce Wood Duck, Red-headed Woodpecker, Northern Parula and perhaps Swainson's Warbler. The trip will end at Noon.

TRIPS 6 & 19: Sandhills Gamelands and Vicinity

This trip will visit some of the birding hotspots within and immediately adjacent to Sandhills Gamelands. Most of the species commonly found in xeric upland Longleaf Pine communities should be seen. There will be a stop along Thunder Road at what most consider the most beautiful stand of Longleaf in the area. In addition to searching for Bachman's Sparrows and Red-cockaded woodpeckers, a Wildlife Commission biologist will discuss how they are gradually restoring Gamelands' forests to their original state. The group will then visit the McKinney Lake Fish Hatchery where they may find lingering shorebirds or waterbirds. If time permits, a stop may also be made along Drowning Creek to search for flocks of migrants. The trip should be over by Noon.

TRIPS 7 & 20: Southern Pines/Pinehurst Area

Walk along the boundary of the historic Moore County Airport to look for Grasshopper Sparrows, Horned Larks and other grassland species. Explore trails at Southern Pines Reservoir Park and Sandhills Community College for migrants and early breeders among the expanse of Longleaf Pines, flowering trees and wetland vegetation. Be sure to wear appropriate footwear and long pants since you will be walking through extensive grassy and damp areas. The trip will end at Noon.

Continued on next page.

Field Trips Continued-

TRIPS 8 & 21: Weymouth Woods State Nature Preserve

Walking about a mile of the loop trails through typical Sandhill drains we will look for flocks of migrant flycatchers, thrushes and warblers. Songs of early Solitary Vireos and Bachman's Sparrows which breed at the preserve, should be heard. There will also be the opportunity to learn about the breeding groups of Red-cockaded Woodpeckers at the park this season. Fox Squirrels are more active this time of year so look for family groups foraging in the woods. In addition, you will have a chance to visit the newly established migration monitoring bird banding station and perhaps see both local and migrant species up close. Wear comfortable shoes and bring a camera - there could be some good photo opportunities. The program will be over at Noon.

TRIPS 9 & 22: Butterflies of the Sandhills

This will be an opportunity to sharpen your Duskywing and Cloudywing identification skills which are plentiful along the trails at Weymouth Woods. Hoary-edged Skippers may also be fairly common at this time of year. In addition, we may encounter Pearly Eyes as well as an American Cooper. The program will last about two hours.

TRIPS 10 & 23: Spring Wildflower Walk

The winding trails of Weymouth Woods will take us through several types of upland Sandhills habitats in search of local spring specialties such as blooming pitcher plants, Sun Dews, Wild Indigo, Goats Rue, Rosy Spiderwort, Sandhill Sandwort, Tread Softly and Queen's Root. The terrain will be good but be prepared to get close to dense vegetation - long pants and long sleeves are encouraged. The walk will be approximately two hours long.

TRIPS 11 & 24: Hummingbirds

This is your chance to ask questions about hummingbird ecology and feeding in North Carolina. Observe Ruby-throated Hummingbirds up close as they are banded as part of ongoing research at the Visitor's Center. Don't forget your camera and plenty of film! The program will end around 3:30 PM or when the hummers thin out at the feeders.

TRIPS 12 & 25: Red-cockaded Woodpecker Nesting Ecology

Join a local woodpecker biologist to learn about the unique ecology of this native endangered species. Hear about the history of woodpecker conservation efforts in the Sandhills. Also field techniques used for monitoring of Red-cockaded woodpeckers during the breeding will be demonstrated. The program will last about two hours.

TRIPS 13 & 26: Pee Dee National Wildlife Refuge and Vicinity

Visit a few different parts of the refuge property including Wildlife Drive as well as walk in to Arrowhead Lake and Ross's Pond. There should be a diversity of forest, wetland, bottomland and grassland species. We should find Red-shouldered Hawk, Red-headed Woodpecker, Yellow-billed Cuckoo, Wood Thrush, Summer Tanager, numerous warbler species including Kentucky Warbler, and sparrows including Song and Field Sparrow. It is possible you may even see Wild Turkeys since they are now plentiful on and around the refuge. There will also be a stop at Blewett Falls along the Pee Dee River to do some woodland birding and hunt for migrant flocks. Wear long pants and do not forget to bring insect repellent since the insects at the refuge can be noticeable even in early spring. In addition, be sure to bring a lunch and plenty to drink since few accommodations are available along the way. The group should be back at the hotel by 5:00 PM.

TRIPS 14 & 27: Laurinburg and Points South

The first stop will be in historic downtown Laurinburg where a pair of Mississippi Kites has nested for the past several summers. The group will also visit Lake Paul Wallace in Bennettsville (South Carolina) that has been a birding hotspot for many years but rather neglected by birders until two years ago when a Western Grebe was discovered there. The lake may be holding a few lingering ducks and waterbirds but its wooded edges should produce good mixed flocks of migrants. There will also be stops at several wet areas and fields along the way including at least one heron/egret/cormorant rookery. You'll have an opportunity to stop for a quick lunch along the way. Trip should be back in Southern Pines by about 5:00 PM.

Notes on the Atlantic Beach Winter Meeting

Good weather, good birds, good speakers — who could ask for anything more at a Carolina Bird Club winter meeting. Bob Holmes, John Fussell and friends organized a good variety of field trips in the Morehead City area, and people got good looks at a number of special birds. Such as:

- Red-cockaded Woodpecker and all other possible woodpeckers save Red-headed, on a trip led by John & Paula Wright.

- Both Sharp-tailed Sparrows, including both races of Nelson's, along with Seaside Sparrow were closely studied.

- Short-eared Owl over the marshes on Cedar Island (for those who hung out until sunset).

- Red-throated and Common Loons in good light on still water, just off the pier at our hotel.

A total of 147 species was observed over the weekend.

Our Friday night speaker, CBC's own Wayne Irvin, dazzled us with a multimedia presentation on birds and other sights he experienced during a visit to Midway Atoll.

Saturday night we heard a compelling and intense talk from the original River Keeper on the Neuse River, Rick Dove. He made clear and urgent the challenges of cleaning up the Neuse watershed in the face of widespread, industrial-strength hog farms.

All right, not everything was perfect — Saturday's winds and cool temperatures made for brisk conditions and elusive land birds. Some of us experienced problems with heat and water in our rooms. And the turnout of about 130 folks was far lower than we often get at these meetings. But those who came got good value, experienced good fellowship, and heard Susan Campbell's tantalizing preview of what's to come in May at Southern Pines. Hope to see you there.

Len Pardue, Asheville, NC

Another Viewpoint

As usual, I had a great time birding at the CBC meeting. It's fun to hook up with old friends and make new ones.

The birding highlight for me was Sunday morning at the Sheraton Pier on Atlantic Beach at 10 am. Joe and I were looking for loons when Debi and Mark arrived. There were several Red-throated Loons, but there was one that was particularly close, giving us great views. As I was looking through the scope, the loon looked at me occasionally. As some of you know, loons are my favorite bird (along with chickadees), so I said "hi there." A few seconds later the loon opened his bill and gave a short yoddlle call. Oh my gosh! The four of us were surprised and thrilled to listen and watch as the loon called several more times, before diving into the water. What a special treat to hear in January on the beach!!

Wade led a nice trip to Lakes Ellis and Simon where we saw several species of ducks. Jim was the leader to Theodore Roosevelt SP where we had nice views of Tricolored Herons, Greater Yellowlegs, and Ruby-crowned Kinglets.

John led a large group to the Davis Impoundment and Cedar Marshes. I was happy to see Common Loons and Oystercatchers, plus seven of us stuck it out till dusk and sighted a Short-eared Owl.

Karen Bearden, Raleigh, NC

FYI

North American Birds (NAB) is a quarterly journal published by the American Birding Association that focuses on bird distribution, status, movements, and migration, and exceptional North American records. It seeks to bridge the divide between the amateur birder and the scientific ornithologist and in the words of Jon Dunn and Greg Lasley "is the best, most accurate and complete picture, season by season, that is available for the North American continent at the continental, regional, and local scale". For more information call (800) 850-2473 or go online to www.americanbirding.org/publications/nabgen.htm You can also request a free sample copy by phone or online.

The Canadian Wildlife Service has just released its *Estimates of shorebird populations in North America* (Occasional Paper Number 104) authored by R.I.G. (Guy) Morrison (2001) and five other Canadian and American ornithologists. Remember that these numbers are best estimates. This 64 page report is available from: Publications, Canadian Wildlife Service, Environment Canada, Ottawa, ON K1A 0H3 (819) 997-1095 (819) 997-2756 (fax)

<http://www.cws-scf.ec.gc.ca>

BIRDING OPPORTUNITIES

Roanoke River National Wildlife Refuge is looking for experienced birders who can share their expertise with us on the Roanoke River. The U.S. Fish and Wildlife Service has received funds to determine the status of the cerulean warbler population on the coastal plain floodplain habitat of the Roanoke River. Birders must be comfortable with identifying the song of the cerulean warbler. Travel, lodging and per diem will be covered for all qualified participants.

The survey will begin May 12, 2001 and finish up the morning of the 13th. Most of you will have to leave on the 13th to return to your jobs on Monday. That's OK. The two days of help will be appreciated. Those of you who can help on the 14th are encouraged to stick around so we can cover more area if necessary. There will be guides available for those not familiar with the Roanoke system. Saturday the 12th is the last day of the turkey hunt so we will be restricted to boats. Sunday we will conduct surveys by foot along creeks. Play back devices will be used when necessary to get responses. In addition, as long as we are all out there, data on other high priority bird species will be collected such as Swainson's and Kentucky warblers, Mississippi kite, bald eagle etc.

If you are interested in this birding adventure, please contact the project coordinator Jean Richter, Refuge Wildlife Biologist at 252/794-3808 or jean_richter@fws.gov

ALLIGATOR RIVER NATIONAL WILDLIFE REFUGE Saturday, May 19th

Starting at Creel Cut [now part of the Charles Kuralt Trail] which is at the beginning of Milltail Rd. on Hwy 64, we will caravan into the refuge to look and listen for 13 species of breeding warblers, including Black-throated Green, Worm-eating and Swainson's. We should also see (or at least hear) Yellow-billed Cuckoo, lots of woodpeckers, vireos, flycatchers, and other neotropical breeders. Black-bellied cuckoo is a possibility.

LOGISTICS:

LEADER: Jeff Lewis [252-473-1086; egardens@inteliport.com]

NO. OF PARTICIPANTS: 12

COST: \$10

MEET: 7:00 AM at the entrance to Alligator River NWR at Milltail Rd on Hwy 64 about 20 minutes from Manteo. Trip will conclude mid to late afternoon.

TO REGISTER: First contact Jeff Lewis to make sure there is room on the trip. Then mail the form below to CBC Headquarters, 11 West Jones St., Raleigh, NC 27601-1029

COMING UP...

VENTURES 2001/2002 TRIPS

Even with snow on the ground, migration is starting to happen and Ventures has select trips slated to take full advantage of the changing seasons. If you have not signed up for a Spring Venture, there is still time. As always, contact our office for details on any of the trips you see here, or visit our Web Site at www.birdventures.com. If you have not visited our website recently, we now have a majority of our trips for 2002 already designed with detailed itineraries posted. It is never too early to start planning!

April 18: NC Arboretum & Bent Creek,
April 22 - 26: Dauphin Island [2 Spaces Left]
April 25: Douglas Falls, NC
April 21 - 29: S. Florida and Dry Tortugas
April 21 - May 6 Costa Rica [2 Spaces Left]
May 1 - 3: Snowbird - [4 Spaces Left]
May 4: Stecoah Gap - Warblers
May 5: Stecoah Gap - Warblers
May 9: Congaree Swamp
May 14: Salamanders in the Blue Ridge
May 12 - 18: Southeastern Arizona
May 19 - 20: MO Prairies w/Kansas City Zoo
May 26 - 27: Spring Migration in the Ozarks
May 23: Lemon Gap & Max Patch
May 26- June 8: East Anglia, England
June 2 - 9: Michigan
June 20: Roan Mountain, NC/TN
June 16-17: Black-capped Vireos in OK
June 16 - 23: Churchill, Manitoba
June 30: Avery Co. Butterflies & Birds

CBC News

CBC policy on "free advertising" for bird-related businesses in the Carolinas. Approved by the CBC Executive Committee, Sept. 30, 2000

- I. The CBC Newsletter and the CBC Rare Bird Alert may publicize the activities of bird-related businesses active in the Carolinas, within these limits:
 - a. The businesses or their proprietors must hold memberships in CBC and their leaders regularly support CBC as volunteers or offer discounts to CBC members.
 - b. Articles and announcements highlighting a business's trips or services may appear no more than twice a year. They should run less than 250 words and mention specific forthcoming trips only as examples of a business's offerings.
 - c. Articles and announcements involving sightings on commercial trips should ordinarily be brief and focus on the birds observed.
 - d. Articles and announcements may include information about how to contact the businesses.
- II. The CBC Web Site may use Newsletter and Rare Bird Alert announcements covered by this policy as the web master sees fit.
- III. Because of its publication schedule and mission, The Chat is not suitable for publication of these articles and announcements.
- IV. Upon approval of this policy, the CBC secretary will notify affected businesses; each summer — after consultation with the Newsletter Editor, the RBA coordinator, the web master and the CBC headquarters secretary — the Secretary will prepare and distribute a list of approved businesses.

Another Opportunity

From Partners in Flight

Any one interested in attending a MAPS beginner bander course (7 days) or a MAPS advance bander course (4 days) contact James Sasser at 919-938-0115 or SASSERBIRD@aol.com. Institute for Bird Populations will only do training classes on request with minimum of 4 and a maximum of 6 participants. If he can get enough participants he will host another course sometime during the summer at Howeel Woods in Johnston County. Banding information gives important data on species productivity and survivorship, and in NC we need to expand this component of monitoring efforts.

SPRING ELECTIONS

Thanks to the CBC nominating Committee of Charlotte Goedsche, Donna Bailey and Clyde Smith [Chairman] the following list of nominees will be submitted to the membership for election at the spring meeting May 5-7, 2001, in Southern Pines, NC.

President:

Van Atkins, Charleston, SC

WNC Vice-president:

Dick Blee, Brevard, NC

Secretary:

Sue Pulsipher, Linden, NC

Treasurer:

Patricia Tyndall, Wake Forest, NC

WNC Member-at-Large:

Charlotte Goedsche, Asheville, NC

ENC Member-at-Large:

Sandy Cash, Durham, NC

SC Member-at-Large:

Kathleen O'Grady, Columbia, SC

Carolina Bird Club Officers

President

Len Pardue, Asheville, NC
16 The Circle, Asheville, NC 28801

Vice Presidents

John Wright, Greenville, NC
Charlotte, Goedsche, Asheville, NC
Donna Bailey, Winnsboro, SC

Secretary

Kathleen O'Grady, Irmo, SC

Treasurer

Patricia Tyndall, Wake Forest, NC

NC Members-at-Large

Bob Holmes, New Bern, NC
JoAnn Martin, Ellenboro, NC
Dwayne Martin, Claremont, NC
Susan Campbell, Whispering Pines, NC

SC Members-at-Large

Carroll Richard, Hampton, SC
Gary Sowell, Hopkins, SC

Immediate past President

Bert Fisher, Durham, NC

Editor of *The Chat*

Bob Wood, Columbia, SC

Editor of the *CBC Newsletter*

Judy Walker, Charlotte, NC

Headquarters Secretary

Tullie Johnson

The CBC Newsletter is published bimonthly by Carolina Bird Club, Inc., the ornithological society of the Carolinas. CBC is a nonprofit corporation headquartered in Raleigh, NC. Founded in 1937 the membership open to anyone interested in birds, natural history and conservation. Members are encouraged to submit items of interest to the CBC Newsletter editor:

Judy Walker,
7639 Farm Gate Dr., Charlotte, NC 28215
birdwalker@mac.com
Submission deadlines are the 10th of January, March, May, July, September and November.

**Submit membership applications
and change of address to:
